

Driven by Excellence.
Guided by Science.

In a 2022 survey of customers developing biologics with Selexis' SURE^{technology}™ Platform, our partners responded with:

OVERALL SATISFACTION

- ✓ Are satisfied with Selexis
- ✓ Would use Selexis technology again

SCIENTIFIC SUPPORT

- ✓ Are satisfied that the Selexis team understands their product development challenges and helps address them
- ✓ Feel the Selexis scientific team is responsive to all technical and development questions

93% are satisfied with the level of **scientific expertise** and **technical support provided** by Selexis

LONG-TERM PARTNER

- ✓ View business relationships from a long-term perspective, not just as a short-term transaction
- ✓ Feel Selexis is a valued partner
- ✓ Value Selexis' ongoing investment in science and technology

93% feel they can rely on Selexis as a **long-term business partner.**

SELEXIS SURE CELL LINE DEVELOPMENT™

Proprietary technology platform and comprehensive services for fast and reliable cell line development:

- Highly adaptable non-viral vectors with no carrying-capacity limitation
- No gene amplification required
- Novel high-throughput approach to address product-specific expression bottlenecks
- Proven track record in the expression of MABs, enzymes, Fc-fusions, GPCRs, ion channels and more
- Documentation ready for IND filing including detailed vector information and host cell line pedigree
- Precise mapping of the transgene integration site(s)
- World-class science, project management
- Highly efficient tech transfer to CMOs

HIGH PERFORMANCE, STABLE RESEARCH CELL BANKS

- No viruses
- Strong expression vectors
- High performance host cell
- Chemically defined, serum-free medium
- Robust and easily transferable feed strategy

ENGAGEMENT

- ✓ Are satisfied with Selexis as a development partner
- ✓ Are satisfied with the way Selexis conducts business
- ✓ Feel the Selexis team is responsive to their needs

93% feel Selexis is flexible in the way it addresses project needs.

VALUE-ADDED PARTNER

- ✓ Are satisfied with Selexis as a value-added business partner
- ✓ Feel Selexis fosters and encourages open and honest dialogues with its collaborators

TRUST AND COMMITMENT

- ✓ Feel their relationship with Selexis is built on trust and respect
- ✓ Agree trust in Selexis and its technology are important reasons why they partner with Selexis

Connect with the leaders in cell line development. From difficult-to-express to novel proteins, Selexis is your partner of choice: www.selexis.com

WHAT OUR PARTNERS ARE SAYING

We value the high quality of the cell lines, experimental work and reporting and documentation, as well as the flexibility and excellent collaboration and communication with Business Development and Project management functions.

Very strong and efficient technology.

The technology works for us in all our platform (and a few non-platform) proteins...

Selexis technical and scientific expertise are very compatible and well versed with path forward.

The teams, scientific and project management, always go the extra mile to satisfy my scientific and business needs.

Their responsiveness is amazing.

I have been working with Selexis for four years now and I we built a very strong relationship built on trust, respect, and collaboration

The scientific and project management teams are wonderful.

Selexis team is open to addressing technical questions and helping us understand challenges in terms of using their workflows. We are happy to see that and consider that type of support to be critical to the relationship. We are not hands-on with the cell line development in the way that Selexis is, so it's critical for us to have a way to answer questions and get more detailed information.
